Dream FTP Server is an easy-of-use FTP server. Unlike many FTP servers, it does not require installation and does not come with a user/administrator interface. It also has a very small resource footprint, and uses very little CPU power and memory. It handles very large directories, and supports connection and session management, file transfer, and logging of uploads, downloads, and file operations. It also allows customizing PASV, FXP, and anonymous FTP settings. It supports file access permissions, and you can customize its security features. Download Dream FTP Server at: November 8, 2003. DELPHI Ftp Server 2000.02 DELPHI Ftp Server 2000.02 is a free and easy to use FTP server that also includes easy-to-use, web-based file browsing. It has a nice user interface, an easy-to-use connection and session management, and a powerful log file manager. It also includes comprehensive security options, such as IP address access control, user and virtual directory management, and easy-to-use, customized server control. It supports IP PBX and PASV connections, and includes support for an unlimited number of files, and file extensions. An additional strength of this product is its ease of use. Features: IP PBX and PASV support, unlimited number of files, file extensions, AND much more! Includes security features such as connection and session management, IP address access control, user and virtual directory management, and customizable server control. Download Dream FTP Server at: October 26, 2002. CAD Server 2002-2.8d CAD Server provides a powerful, easy-to-use, and robust CAD server solution.
